

VARGA ÁDÁM MARCELL

BUDAPEST · ADAMVARGA.HU · varga.99.adam@gmail.com

Software Engineer with experience building large-scale backend systems and modern Angular applications. Experienced in high-volume systems and customer-facing features, with a strong focus on clean architecture, maintainable code, practical solutions and attention to detail in UI and user experience.

WORK EXPERIENCE

Software Engineer

Magyar Telekom Nyrt. - 2022.09 - present

- Developed and maintained a high-volume notification engine handling SMS, email, and push notifications for Telekom Hungary using Spring Boot (Kotlin).
- Contributed to frontend development with Angular, including implementing UI updates for the Telekom webshop based on a new design system and component library.
- Developing customer self-service features (billing, permissions, subscription management) using Angular and RxJS.

Front-End Developer

EN-CO Software Zrt. - 2021.07– 2022.08

- Developed and maintained a large-scale government web application (5+ years in production) for accounting, project financing, and data management using Angular, RxJS, and Angular Material, delivering new features, handling client change requests, and resolving bugs in complex, data-driven interfaces.

EDUCATION

Budapest University of Technology and Economics

Master's degree, Specialisation in Applied Computer Science

2022-2025

Budapest University of Technology and Economics

Bachelor's degree, Computer Software Engineering

2018-2022

PROJECTS AND AWARDS

PhysioNow clinic website and booking system development

- Built a full-stack appointment booking system with Angular, Hono.js, SQLite (D1), and Cloudflare Workers.
- Implemented admin panel for managing employee schedules, appointments, and patient data.
- Integrated AWS-based email notifications for booking workflows.

Multitenant Ideation Platform

- Built a full-stack multitenant ideation platform using Angular and Spring Boot (Kotlin).
- Implemented structured workflows for idea lifecycle management (creation, evaluation, completion).
- Designed a multitenant SaaS architecture with role-based access control.
- Enabled secure, isolated environments for multiple organizations.

CraftHack 2021 Grand Winner

- Won first place in an international hackathon (UI challenge by EPAM)
- Designed a mobile platform concept connecting remote and office employees

SKILLS

- Angular
- TypeScript
- RxJS
- Spring Boot (Kotlin)
- Node.js (Express, NestJS)
- HTML, CSS
- REST APIs
